

LADA-VAZ ZHIGULI 2106

Created by Arman for NFS4 and converted by Opus IV Gamer to NFS3 | armancz@centrum.cz | opusivgamer@gmail.com

This is a Lada-VAZ Zhiguli 2106, the Soviet version of the Fiat 124, which was widely circulated in the USSR in the 1980s, thanks to its cost-effective purchase and use, now available for Need for Speed III.

This model is not mine, since it is a conversion from Need for Speed IV: High Stakes of the same car created by Arman, so I give credits to him (e-mail: armancz@centrum.cz) (website <http://www.arman.xz.cz>).

This car has realistic performance, steering and rolling, is available to AI opponents drivers in the class C and in all supported languages. To install it put "2106" folder that you find in the downloaded Zip file into "C:/Program Files/Electronic Arts/Nfs3/Nfs3/Gamedata/Carmodel".

A slide is also available named "48_00.qfs", that will appear on the screen before every race, to insert in the path "C:/Program Files/Electronic Arts/Nfs3/Nfs3/Fedata/Art/Slides". Image credits: by granada_turnier - Lada 2106, 1978, CC BY 2.0, <https://commons.wikimedia.org/w/index.php?curid=17316401>.

This model is available by default in yellow only, if you want to change it in the "2106" folder you will find subfolders with the names of the various colors of the car. First download from this link VIV Wizard <https://www.nfscars.net/need-for-speed-hot-pursuit/1/files/view/1107/> open the "car.viv" file in the "2106" folder with this program, on the left you will find the list of all the files contained in the "car.viv", here click with the right mouse button on "car00.tga" and in the drop-down menu click on Import, choose the color you want from the sub-folders mentioned above, save and close the program.

If you would like to modify, convert and/or distribute this addon, please put Arman and Opus IV name as the original authors of this addon in the Readme file and/or in the site.
