

BENTLEY HUNAUDIERES

Created by Felipe (OnZ) Santos for NFS4 and converted to NFS3 by Opus IV Gamer
opusivgamer@gmail.com

This is a Bentley Hunaudières, a concept car built by Bentley for the 1999 Geneva Salon International de l'Auto. It is powered by a Volkswagen 8.0-litre, naturally aspirated, W16 engine adapted and modified by Bentley to generate 623 bhp (465 kW; 632 PS) of power at 6,000 rpm and 760N·m (561 lb·ft) of torque at 4,000 rpm in conjunction with a five-speed manual transmission. It is capable of a 350 km/h (217 mph) top speed. This model has never entered production, as this concept car led to the production of the Bugatti Veyron from the parent company Volkswagen.

This model is not mine, since it is a conversion from Need for Speed IV: High Stakes of the same car created by Felipe (OnZ) Santos, so I give credits to him.

This car has realistic performance, steering and rolling, is available to AI opponents drivers in the class A and in all supported languages. To install it put "byhs" folder that you find in the downloaded Zip file into "C:/Program Files/Electronic Arts/Nfs3/Nfs3/Gamedata/Carmodel".

You are allowed to convert this car to another Need for Speed version or to another game or using it as a basis for your projects only with the permission of the original author of this model (Felipe OnZ Santos), by contacting him at this e-mail address: onz1988@gmail.com
